

Fare il tampone

In questo momento potrei ammalarmi.

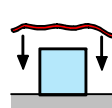

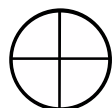

L'influenza che posso prendere viene dal coronavirus.

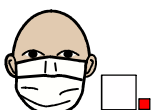

Per vedere se ho preso questa malattia devo fare il

tampone.

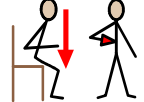

Mi farà l'esame un infermiere tutto coperto da camice,

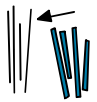

mascherina, cuffia e visiera.

 Mi chiede di sedermi e mi infila un bastoncino sottile

 dentro il naso, lo strofina e poi lo toglie.

 Per provare poco male, devo stare fermo.

 Può essere un po' fastidioso e forse mi fa lacrimare ma

 è molto veloce.

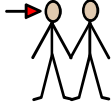

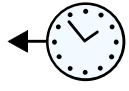

10

 Posso contare fino a 10 ed è tutto finito.

 Il giorno dopo saprò se mi sono ammalato.
